

The State of Agility

The journey to data driven transformation

Marcella Koopman

Our Observations

Most Agile transformations tend to “fail”:

- Slow down after initial growth
- Have no clear direction of where things are heading
 - Applies to people *and* the organization as a whole

Organizations have difficulty measuring:

- The state of agility
- The transformation itself
- Effectiveness of coaching

And some companies are just awesome at this!

The 5 pitfalls of a Scrum Master

#1

The Scrum Master is the secretary of the team

#2

The Scrum Master is the police office

#3

The Scrum Master is answer man

#4

Scrum Master is not a full-time role

#5

It can be anybody

The 5 pitfalls of a Product Owner

#1

THE PRODUCT
BACKLOG IS A LIST OF
ALL FUTURE WISHES
FOR THE PRODUCT

#2

CHIEF PRODUCT
OWNER

#3

PO IS SWITCHBOARD
BETWEEN
STAKEHOLDER AND
DEV. TEAM

#4

PRODUCT OWNER AS
A HIERARCHICAL
POSITION

#5

PO IS NOT THE PO,
BUT THE PM
SECRETARY

Where to?

Data Driven Transformation

How we measure: State of Agility

Get data driven insights in:

- where you are today
- where you can grow to
- what your strengths and pitfalls are
- how Agile your organization really is

Get proactive in changing!

How?

- Quarterly assessments for Product Owners, Scrum Masters, Development Teams and Agile Leadership (Agile coaches and Culture are coming up)
- Selfies per Sprint; more focus on your own goals
